Train with one of the most talented criminal interviewer and instructor in the most comprehensive, powerful, scientifically proven interviewing technique ever developed.

The content, exercises and instruction offered in this training course exceeds the quality of interview training received by the FBI, ATF, Military Intelligence, Scotland Yard and Texas Rangers.

Experience the finest in Interview training.

I have attended dozens of training seminars regarding interviewing. The Analytic & Cognitive Interviewing Course offered here stands among the best. Tab and Mary stick to the science and techniques that work without relying on gimmicks or unproven methods. Their training is relevant not just for interviewing suspects, victims, and witnesses in the most effective manner possible but also for fostering a sense of connection and an understanding of why these techniques work in our interactions with other people.
Ryan Hayden
Detective Sergeant
Topeka Police Department

During my time in Law Enforcement I have attended numerous trainings, seminars and conferences. The Analytic & Cognitive Interviewing Class is one of the best. The training provided in this class is one of the most important trainings a detective can attend for learning how to interview and interact with people. The training itself blends lecture and hands on activity that makes this class an engaging and satisfying class to attend. Prior to this training I felt comfortable interviewing victims, witnesses and suspects. After attending this training my confidence has significantly increased as the training has provided me with how to structure my interviews to get the maximum amount of information out of people.
Luke Jones
Detective
Topeka Police Department
