

# A Martyr's Psyche

"Understanding the Extremist's Ideology"

## Course Description

For too long, law enforcement's response to extremism has been reactive—tactical teams mobilizing only after an attack occurs. Prevention has often taken a backseat. A Martyr's Psyche is a game-changing 1-day training course that shifts this dynamic, equipping law enforcement and intelligence professionals with the tools to identify threats before they materialize.

This exclusive program provides a foundational understanding of extremist ideologies, the psychological mechanisms behind indoctrination, and practical elicitation techniques that can be applied across all law enforcement assignments. By recognizing the dangers before an attack unfolds, officers can take a proactive approach to safeguarding communities.

Developed & delivered by a former child soldier from the Middle East turned 27-year law enforcement veteran, this course offers unparalleled firsthand insight into the recruitment tactics, psychological manipulation, and operational strategies of extremist groups. Participants will gain an in-depth cultural and ideological perspective that helps distinguish peaceful religious practices from radical ideologies, allowing them to effectively identify potential threats without bias.

**Cost: \$249**

**Credit Card Payment Only**

**Deadline for Cancellations**

**August 1st, 2025**

## Key Takeaways

- ✓ **Mastering Elicitation for Threat Identification**
  - Learn how to use strategic questioning and elicitation to uncover radicalized mindsets and extremist ideologies during interviews and field interactions.
  - Develop skills to extract critical intelligence while maintaining rapport and operational effectiveness.
- ✓ **Understanding the Extremist Mindset**
  - Explore the psychological and cultural drivers behind radicalization.
  - Gain personal insights from the instructor's experiences of indoctrination and deprogramming.
- ✓ **Recognizing Warning Signs of Radicalization**
  - Identify behavioral, linguistic, and ideological indicators of extremism.
  - Analyze recruitment tactics used in both the Middle East and Western societies.
- ✓ **Bridging Cultural Gaps for Effective Field Operations**
  - Develop cultural competency to navigate interactions with diverse communities.
  - Learn how to engage in productive dialogue that encourages cooperation and intelligence gathering.

### Why This Course Matters:

- Unlike training programs that rely on secondhand intelligence, A Martyr's Psyche is built on real-life experience from someone who has lived through indoctrination and later spent decades combating transnational threats. This is not just another theoretical course—it is a critical training resource that equips officers with actionable intelligence, field-tested methodologies, and life-saving skills to combat extremism at its core.
