

ADVANCED K9 DETECTION COURSE

3 day detection course designed to elevate detection teams from training-level performance to true operational readiness. This course focuses on bridging the gap between the current training program and real deployments by evaluating each team's current capabilities, any potential limitations, and any SOPs, then tailoring the training plan specifically to meet their real-world deployment needs and legal scrutiny.

Through 3 intensive days of scenario-based learning, handlers and dogs work through practical detection problems, operational and/or tactical deployments, and sound decision-making exercises that replicate the pressures of actual K9 deployment.

PSO MEMBERS MUST SUBMIT A TRAINING/ TRAVEL REQUEST TO BE REGISTERED
